

The Air Chief Rapid Repeater Gen 2 PCP Air Rifle is capable of single shot shooting or multi-shot shooting with the attachment of a magazine. Plugging in the magazine is easy by simply opening the bolt, pushing out the single-shot adapter and sliding the magazine in along the grooves with the magnet facing down. It has sights for shooting without optics but has an 11mm rail for placing an optic. The front and rear sights can be easily removed.

A PCP air rifle uses compressed air as its power source and people love the power and accuracy you can get! The benefits of pre-charged pneumatic air rifles are multi-shot power and accuracy which can go a long way in the fun for both newbies and more experienced shooters alike.

Please note that all PCP air rifles require a firearms licence to purchase, and they need to be stored and treated the same as firearms.

Features:

- Bolt action cocking lever
- Pressure gauge at the tip of the tank
- Tank capacity: 100cc. Made of steel
- Maximum loading pressure: 200 bar

- Air Capacity: 100 CC
- Regulator: Yes
- Magazine Capacity: 7 (.22)
- Trigger Pull: 0.5-4 Lbf
- Safety Force: On/Off 1-6Lbf
- Barrel Length: 480mm / 18.9"
- Max Pressure: 20 MPa
- Overall Length: 950mm / 37.4"
- Weight: 2.27kg
- Stock: European Beech

(RAG-002)

Important note: it is recommended to not run the rifle under 10BAR to avoid damage to the valve system. Also avoid shooting the rifle until out of gas as this runs the risk of a pellet lodging in the barrel
